

Old Method

New Method

Safer Faster Easier

KEY FEATURES

- 1 6.5 HP Petrol engine.
- 2 Self and kick start system.
- 3 Fuel efficient (1 liter /hr consumption)
- 4 20,000 sqr feet/hr racking speed.
- 5 Double Silencer for minimum noise.
- 6 Rechargable High Quality battery.
- 7 24 strong and powerful blades.
- 8 Adjustment rods for depth adjustment Of blades.
- 9 Hard magnetic metal external Skeleton.
- 10 Bicolor multicoated powdered color for protection from rust.
- 11 Thermoplastic tyres designed for all type of floors.
- 12 Returns investment within a flock.
- 13 Less maintenance cost.
- 14 Minimum physical effort.

Features & Benefits

User-friendly

Consumes less Fuel

Effective in rainy & winter season

20000 Sq. ft. raking in 1 Hr.

Enclosed design safe for birds

Low sound

Less efforts, Least maintenance

High income improved FCR

Health of Chicken, FCR & Mortality - all of these are completely dependent on - **The Effective Raking.**

Reduction in Ammonia Level & Improvement of Chicken's Health depends on - **Regular Raking.**

RACKER

Racking and managing litter is very crucial part of poultry farming. Traditional racking methods are intensive and require too much time, cost and effort

Hope Genomics(Pvt)Ltd did a comprehensive research on racking problems and developed The RACKER, an engine operated unique racking machine which solves the problem of racking effectively and significantly improves the bird's health.

With the help of modern technology and innovative design, Racker is capable of reducing racking time by 75% and can be operated by single person.

Why RACKER?

When racking is done by RACKER, it

- * Helps in keeping the litter dry
- * Helps in reducing ammonia significantly
- * Prevents bacterial growth in litter
- * Prevents growth of poultry bugs
- * Prevents growth of parasites
- * Improves FCR
